Neowork.NN@gmail.com

Bangkok, Thailand 10150

SKILLS

- Languages: Python, TypeScript, JavaScript, SQL
- AI/ML: PyTorch, TensorFlow, RAG, MediaPipe, Scikit-learn, LangChain
- Web Development: React.js, Next.js, Node.js, FastAPI, Tailwind CSS
- Cloud & Tools: Firebase, Cloud Functions, Docker, Git, REST APIs
- Design: UI/UX Design, Responsive Web Design

SOFT SKILLS

- Problem Solving
- Critical Thinking
- Team Collaboration

CERTIFICATIONS

Agentic AI with LangChain and LangGraph | IBM
(via Coursera) Issued Mar 2026

- Credential ID: [EQYX7VY14P5M](#)

LANGUAGES

- Thai (Native)
- English (Conversational)

Education

Bangkok University

B.Eng. in Artificial Intelligence and Data Science
Expected May 2026 | GPAX 3.56

Suankularb Wittayalai Thonburi School

High School Diploma (Science-Mathematics), English Program
Graduated March 2022 | GPAX 3.50

Work Experience

Thesis | AI-Powered Learning Platform

Bangkok University | 2026

- Architected and developed an end-to-end full-stack web application to teach sign language to non-hearing-impaired users, utilizing a modern tech stack (e.g., React.js, Node.js).
- Developed and fine-tuned a custom Computer Vision model (e.g., using TensorFlow/MediaPipe and Python) capable of real-time sign recognition from user camera input, achieving an accuracy of [90]%.
- Engineered the model to recognize a vocabulary of over [25] sign language words, optimizing for low latency for a smooth, interactive learning experience on the web.
- Deployed AI inference logic as Serverless Functions on Firebase Cloud Functions, creating a scalable backend API for the web application.
- Optimized backend performance and reduced server costs by leveraging Firebase's serverless infrastructure to handle on-demand API requests.

Co-op Frontend Developer

Botnoi Consulting Co.,Ltd. | June 2025 - Nov 2025

- Developed and optimized responsive web applications using React.js and Angular, ensuring high performance and a seamless user experience across all devices.
- Architected reusable UI components with Tailwind CSS, reducing development time for future features by 20%.
- Collaborated with UI/UX designers using Figma to translate complex wireframes into high-fidelity, interactive web interfaces.
- Collaborated with team members to streamline communication processes across departments.
- Analyzed problems and worked with teams to develop solutions.

Mini Project | Social Media Website

Bangkok University | 2024

- Designed and developed a robust web communication system using Ruby on Rails. The project involved creating a scalable and efficient backend to handle communication processes seamlessly. Comprehensive testing was conducted to ensure reliability and functionality, including unit testing, integration testing, and system testing. The final deployment was successfully executed on Render, a modern cloud platform, enabling a reliable and scalable hosting environment for the system.
